revolutionEHR PRESENTS

revYOU

Let the Data Work for You

Ali Khoshnevis, Manager, Consumer-facing Applications

Chad Cantrell, Software Engineer

RevConnect
Patient Engagement - Problem

- Human intensive
- Measure
- Actionable data
- Automation

revYOU connect. learn. advance.

The Patient Engagement Solution

- Its ALL Rev
- One Screen | One System
- Reminder/recall system efficacy
- Office efficiencies
- Revenue driver

- **DEMO**

revYOU connect. learn. advance.

RevIntegrator… In the Past

Getting images uploaded into RevolutionEHR

- Had to save a file then go into Documents and images for that patient, navigate to the correct directory and then upload the file
- Worked, but was quite labor intensive
- Alternative solution was to save the file and then go into the desired patient file and encounter and upload the file from the test you wanted that image or document associated with
  - This allowed you to get to the file from the encounter, but was still quite labor intensive

The New Reality

Getting files uploaded into RevolutionEHR is really quite easy, some would say "slick"

- File is saved to a directory
  - This can be local to the computer you're working on or a network directory somewhere in the office
  - RevIntegrator For Imaging monitors these directories and when files are detected, starts the integration/upload process.
    - All the user has to do is confirm which patient the file belongs to and the file is uploaded to that patient's file and attached to the desired test

And There's More…….

During configuration of RevIntegrator For Imaging, you determine where files from any given monitored directory will go and Rev does the rest.

Types Of Data That Can Be Integrated This Way:

Photos (Ant Seg, Post Seg etc), OCT reports, VF Results/reports, Diopsys Results/Reports

There's More Coming Too…..

- Post upload deletion of local file
- Analyzing "meta data" from the file to make the upload even more direct, require zero user interaction
- Ability to configure multiple computers/instances of RevIntegrator for Imaging on a local network
- Other items that users come up with…..

Pulse Points

- Beta Version Sneak Peek
- First Version 13 Metrics
  - From All Zones of Practice
- Cost will be $0
- Early Feedback?

GIVING YOUR PRACTICE AN OPPORTUNITY TO

Drive Excellence

Peer to Peer Roundtable Discussions – 4:30 – 5:30 pm

- Gather in the Enterprise Ballroom (rooms 1 – 4) at 4:30
- Discussion tables will be divided into:
  - Clinical Care (Topics designed for Providers and Techs)
  - Back Office/Billing
  - Product and Ordering Professionals
  - Front Office/Admin
- This session is designed to promote discussion among peers, we ask that you leave your laptops and tablets off during this time.
